**Subject:** Draft UT/EPA Meeting Action Items

Carl –

Here are the action items that I have from our Utah meeting on December 17, 2014.

### **Utah/EPA Region 8 December 17, 2014 Meeting – Action Items**

1. PM10 Maintenance SIP – In early January 2015, Utah to send Region 8 a task list of issues that need fixed. Region 8 will add tasks to the list, if needed. Both Utah and Region 8 will re-institute a standing monthly call to address the task list issues. Utah to take a new PM10 Maintenance SIP to its Board in September 2015, public comment in October 2015 and final SIP to Board in December 2015. Region 8 to act on PM10 SIP before PM2.5 SIPs. Region 8 draft proposed action based on Utah's draft SIP and issue proposed action shortly after receiving final Utah PM10 SIP.
2. PM2.5 Attainment SIPs – Region 8 to add PM2.5 issues to the PM10 task list to be worked on simultaneously. Utah to propose for comment revised PM2.5 SIPs, likely before September 2015.
3. PM10 Transportation Conformity – Region 8 has to publish a final action by May 15, 2015. Region 8 and Utah staff will continue to work on this SIP revision, including a 110(l) analysis.
4. Regional Haze - Utah agreed to do the Better-Than-BART (BTB) analysis/SIP and take to the February 4, 2015 Board meeting to request public comment (start March 1<sup>st</sup> for 30 days comment) on the new proposed BART SIP. Utah will not finalize the existing proposed BART SIP. Region 8 staff will work with Utah staff on the BTB analysis/SIP in order to meet February 2015 Board meeting deadlines.
5. Uinta Basin – Region 8 meet with Ute Tribe to discuss ozone violations in the Basin, EPA's role, and a Basin-wide approach to address ozone issues. Second meeting with Tribal Council, Region 8, and Utah to discuss an EPA FIP; or Tribe

adopting the Utah oil/gas regs for existing sources to level the regulatory requirements "field." Also, discuss the need for one EI database for the Basin for the upcoming Utah SIP/EPA FIP.

Questions for Region 8 Followup: Can the Ute Tribe be part of the WRAP? Did Minnie talk to the Tribal Council about the importance of the EI?

6. SO<sub>2</sub> – Utah will complete modeling of SO<sub>2</sub> sources and work on revised SO<sub>2</sub> maintenance plan. **Carl – did UT talk about timing for this SIP?**
